

# Outdoor Learning Newsletter: September 2021

Jacob and Max have had a busy first month as our Ambassadors- they introduced themselves to KS1 during their assembly and welcomed Sandra Byrne the Cleaner, Greener Project Officer from Wyre Borough Council.

Sandra visited school during "National Recycling Week" and all the classes took part in our challenge, finding out about items that can be recycled and what we can do if they cannot go in a specified bin.

Mrs Mylecraine and Mrs Gorrie received a lovely email following the sessions from Sandra which included:

"I thought the children were very engaging and wonderfully behaved."

KS1 Have been finding out 'How to draw a penguin', identifying and comparing the suitability in a variety of everyday materials- this of course came in very useful when preparing for our visiting hedgehog!

KS2 have taken their learning outside and been experimenting with magnets and using their forces knowledge to achieve their challenge!

Year 4 have challenged each other with their recycling knowledge and encouraging everyone with this.

We have found out how to write our names using Hieroglyphics and researched Charles Darwin.

Well done everyone- we are delighted with your enthusiasm for Outdoor Learning even in the rain!
